Questions? E-mail us at: contactus@nkwsd.com

Notice - Next Board meeting will be held at the City of Hayden Lake's City Hall on October 6 at 2 p.m.

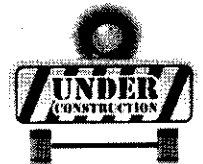

Conservation Tip:

Garbage Disposal - Use the garbage disposal less and the garbage more; or, even better, start composting!

Construction News:

Avondale Phase 2 - The pipeline replacement project continues this fall on Friar Drive. S&L Underground is the contractor that won the bid for this project, and also Schedule B, which will begin in the spring of 2012. Schedule A will cover Friar Drive from Ntakan Village Condos to Eastshore Drive. Schedule B will include Saxon, Eastshore, Tudor and the remainder of Friar. The old steel water main is being replaced with PVC pipe. New fire hydrants, individual water service lines, and meter boxes will also be replaced.

Chilco Booster Station - Work on the completion of the booster pumps and related controls is ongoing. Completion of the project is scheduled for later this month. The new booster pumps will provide an even, constant pressure for the Chilco Service area.

Highway 95 - The District's water main on the east side of Hwy. 95 is being impacted by ITD's road project. A new line is scheduled to be installed this fall from approximately 1/4 mile south of Corbin Hill Road to the old Rimrock golf course. Residents south of the old golf course are losing their private wells due to the construction corridor expanding, and have petitioned to annex into the District. The District has agreed to provide water service to these residents provided they agree to pay for the main line extension and all costs associated with the extension.

Twin Lakes - The District is currently working to replace the lake line that rests on the bottom of the lake from Bridge Lake Road to Fish Lake Road. This water line supplies residents on the northern most portions of Lower Twin Lakes.

2012 Planning - Lakes Highway District has received some federal money to reconstruct Lancaster Road from Government Way east to Ferndale. North Kootenai Water District is going to replace our Rimrock transmission main in this section of Lancaster Road. Costs to replace this main (which has had two catastrophic main breaks in the last 1-1/2 years) will be lower when done in conjunction with the highway district's project.

Remember, you must call 811 before digging for any reason, at any depth, at least 48 hours prior to digging. If you don't, and you hit a utility, you may be billed for the repairs!

**Locates Are Free,
Repairs Are Not!**

Thanks to all of our customers who so graciously help others by donating to the Financial Aid program. 100% of donations are given to those in need.
