Construction News:

Chilco Waterline Replacement - The replacement of the existing NKWD waterline on the east side of Hwy 95 is now complete. Final testing of the new main will be completed on December 16, 2011. The new 8" main will replace the existing 6" main impacted by the Hwy 95 expansion project. While the new waterline simply replaces an existing main, the move was necessary due to the ITD highway project. Cost of the new waterline will be split between the District and ITD. The contractor will begin connecting existing water services to the new waterline on December 19th.

Chilco Waterline (East) Extension Project - A Local Improvement District (LID) was formed over a number of properties south of the existing Chilco service area on the east side of Hwy 95 for a waterline extension project. This project was put out to bid and Scarsella Brothers was the low bidder. They were awarded a contract to construct some 5000' of 8" waterline along with 15 services to properties included in the District's LID #3. Funding for the project is a low interest DEQ loan that will be repaid by the property owners served by this line. No costs for this project will be paid by existing District customers. Scarsella Brothers will likely be starting the project after the first of the new year.

Lancaster Waterline Project - NKWD is installing a new 16" transmission main from the well field west of Hwy 95 to Ferndale Road. The waterline has been completed and is operational from the wells to the east side of Government Way. The contractor, L&L Cargile, will resume construction on January 3rd.

Our goal is to have this waterline completed prior to the heavy construction work on Lancaster Road. Lakes Highway District has awarded a road construction contract to MDM Construction that will straighten out Lancaster Road and install a new bike path along this corridor.

Avondale Waterline Replacement Project - This project will resume in the spring of 2012. Work will be on Friar, Eastshore and Saxon Drive.

Conservation Tip:

Check faucets and pipes for leaks. A small drip from a worn faucet washer can waste 20 gallons of water per day. Larger leaks can waste hundreds of gallons.

The office will be closed on Monday, December 26th and Monday, January 2nd in observance of Christmas and New Year's.

Merry Christmas!

Have a safe and happy new year.

Tom Crimmins, Board of Directors Pres.

Mike Galante, Dist. Manager

Board Meetings - Meetings are held at the District office on the 1st and 3rd Thursday of each month at 12:30 p.m.
